TRAINING | IMPLEMENTING | NETWORKING

Navigating NICE [NG28] Type 2 Diabetes Guideline for your Population

Virtual Workshop

Tuesday 17th May 2022

20:00-21:30

[Book Here](#)

All elements of this programme have been sponsored by Novo Nordisk, including the online e-learning platform, virtual workshops and online implementation resources. Novo Nordisk has not had any input into the content or involvement in the creation of these materials. All materials have been developed independently by Soar Beyond and the i2i Network Faculty.

The i2i Network is brought to you by Soar Beyond

Overview

The i2i Network is delighted to be building on our on-demand diabetes programmes designed for GP Clinical Pharmacists. NICE Guidelines for Type 2 Diabetes Mellitus (NG28) has left primary care clinicians both clearer and yet potentially more confused when making treatment decisions for people living with type 2 diabetes. In this virtual workshop you will hear insights and points of debate from our expert speakers on NG28, its practical implementation at a population level for GP clinical pharmacists and its application in clinical scenarios.

What to expect from this virtual workshop:

- Debate on the rationale and population health considerations for NG28 with a focus on GLP-1RAs
- Clinical scenarios and how to practically apply NG28 with guidance from our expert speakers
- Sharing of best practice and practical tools to implement and support improved type 2 diabetes care in practice

Dr Patrick Holmes

Patrick is a GP partner in Darlington with a special interest in diabetes and is on the committee of the Primary Care Diabetes Society. Patrick was involved in the design of the largest integrated diabetes service in the UK serving the population of Darlington and County Durham, and is now the Diabetes Clinical Lead for Tees Valley CCG, County Durham & Darlington Foundation Trust. Patrick is the National Institute for Health and Research Primary Care Lead for the North East Clinical Research Network. Patrick is also one of the celebrity “Goggledocs” who are not afraid to debate, challenge and court controversy on all things clinical and cardio-metabolic.

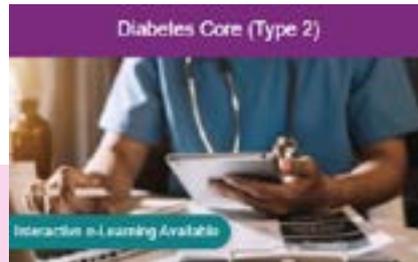

Sarah Baig

Sarah Baig balances her role leading a team across Dudley with her passion for upskilling and supporting as Programme Director for Independent Prescribing and Lecturer in clinical pharmacy at the University of Birmingham. Until recently, Sarah was a lead PCN pharmacist and is therefore well-placed to support, empower and inspire others on their development and leadership journey. Formerly, Sarah specialised as a lead pharmacist in medicines information, diabetes and renal care so has deep expertise and knowledge of diabetes care, which she now applies in her role on the UKCPA diabetes committee.

Novo Nordisk is now supporting three diabetes programmes available on the i2i Network platform catering for the spectrum of confidence and competence in type 2 diabetes management

Aims:

- Increase confidence and competence to understand different treatment options and how to optimise therapy
- Support you to proactively find uncontrolled patients at first and second intensification
- Equip you to structure and conduct effective Type 2 Diabetes Mellitus review clinics

Aims:

- Support pharmacists already conducting Type 2 Diabetes Mellitus clinics to detect and manage patients with co-morbidities: Chronic Kidney Disease, Cardiovascular Disease and frailty
- Equip you to identify and stratify these patients at population level
- Support you to implement structured Quality Improvement using 4D™ for your patient population

Aims:

- Increase confidence and competence in managing injectable therapies including insulin
- Support you to counsel on injection technique and overcome patient and clinician barriers
- Support you to proactively find and manage uncontrolled patients
